KEY FEATURES

- Non-Metallic Composite Toe – Strong Impact Protection Without Extra Weight
- Flyknit and Nylon Mesh Upper for Breathability and Flexibility
- Hi-Poly and EVA/Rubber Sole for Cushioning, Traction and Stability
- Engineered to Reduce Foot Fatigue on Long Shifts
- Modern Black Design Suitable for Industrial and Professional Environments

The Shelter SH400 Composite Toe Safety Shoes deliver durable, lightweight protection for Saudi professionals who need reliable safety footwear without the weight of steel. Designed for industrial, construction and electrical work, these black safety shoes combine modern Flyknit styling with proven worksite performance. The composite toe cap provides robust impact protection without adding extra weight – ideal for electricians, oilfield workers, airport staff and any environment requiring non-metallic PPE. The black Flyknit and nylon mesh upper ensures breathability and flexibility through hot Saudi shifts, while the Hi-Poly and EVA/rubber sole offers excellent cushioning, traction and stability on various surfaces.

Best For: Electrical work, oil & gas, construction, warehousing, manufacturing and any environment requiring lightweight non-metallic PPE across Saudi Arabia.
